

Table of Contents: Volume 1

Preface
Rafal Ablamowicz and Bertfried Fauser

Preface to Volume 2
John Ryan and Wolfgang SpröBig

Dedication to Gian-Carlo Rota
Bernd Schmeikal

1. Physics—Applications and Models

Multiparavector Subspaces of Cl_n
Theorems and Applications
William E. Baylis

Quaternionic Spin
Tevian Dray and Corinne A. Manogue

Pauli Terms Must Be Absent in
Dirac Equation
Kurt Just and James Thevenot

Electron Scattering in the Spacetime
Algebra
*Antony Lewis, Anthony Lasenby, and
Chris Doran*

2. Physics—Structures

Twistor Approach to Relativistic Dynamics
and to the Dirac Equation—A Review
Andreas Bette

Fiber with Intrinsic Action on a 1+1
Dimensional Spacetime
Robert W. Johnson

Dimensionally Democratic Calculus and
Principles of Polydimensional Physics
William M. Pezzaglia Jr.

A Pythagorean Metric in Relativity
Franco Israel Piazzese

Clifford-Valued Cliffords: A Geometric
Language for Dirac Equations
Jose G. Vargas and Douglas G. Torr

3. Geometry and Logic

The Principle of Duality in Clifford
Algebra and Projective Geometry
Oliver Conrad

Doing Geometric Research with
Clifford Algebra
Hongbo Li

Clifford Algebra of Quantum Logic
Bernd Schmeikal

4. Mathematics—Deformations

Hecke Algebra Representations in
Ideals Generated by q -Young Clifford
Idempotents
Rafal Ablamowicz and Bertfried Fauser

On q -Deformations of Clifford Algebras
Gaetano Fiore

Dirac Operator, Hopf Algebra of Renor-
malization and Structure of Space-time
Marcos Rosenbaum and J. David Vergara

Noncommutative Spaces for Graded
Quantum Groups and Graded Clifford
Algebras
Michaela Vancliff

5. Mathematics—Structures

Clifford Algebras and the Construction of
the Basic Spinor and Semi-Spinor
Modules
Johan Gijsbertus Frederik Belinfante

On the Decomposition of Clifford
Algebras of Arbitrary Bilinear Form
Bertfried Fauser and Rafal Ablamowicz

Covariant Derivatives on Minkowski
Manifolds
*Virginia V. Fernández, Antonio M. Moya,
and Waldyr A. Rodrigues, Jr.*

An Introduction to Pseudotwistors:
Spinor Solutions vs. Harmonic Forms
and Cohomology Groups
Julian Lawrynowicz and Osamu Suzuki

Ordinary Differential Equation:
Symmetries and Last Multiplier
*Zbigniew Oziewicz and José Ricardo
R. Zeni*

Universal Similarity Factorization Equa-
lities Over Complex Clifford Algebras
Yongge Tian

Index

Volume 2: Table of Contents

Preface
John Ryan and Wolfgang SpröBig

Preface to Volume 1
Rafal Ablamowicz and Bertfried Fauser

1. Partial Differential Equations and Boundary Value Problems

On Quaternionic Beltrami Equations
Uwe Kähler

Möbius Transformation, Green's Func-
tion and Degenerate Elliptic Equation
Xinhua Ji

Quaternionic Analysis in Fluid Mechanics
Wolfgang SpröBig

2. Singular Integral Operators

Fourier Theory Under Möbius
Transformations
Xinhua Ji, Tao Qian, and John Ryan

On the Cauchy Type Integral and the
Riemann Problem
*Juan Bory Reyes and Ricardo Abreu
Blaya*

Convolution and Maximal Operator
Inequalities in Clifford Analysis
Mircea Martin

3. Applications in Geometry and Physics

A Borel-Pompeiu Formula in C^n and Its
Application to Inverse Scattering
Theory
Swanild Bernstein

Complex-Distance Potential Theory and
Hyperbolic Equations
Gerald Kaiser

Specific Representations for Members of
the Holonomy Group
John Snycgg

An Extension of Clifford Analysis
Towards Supersymmetry
Frank Sommen

The Geometry of Generalized Dirac
Operators and the Standard Model of
Particle Physics
Jürgen Tolksdorf

4. Möbius Transformations and Monogenic Functions

The Schwarzian and Möbius Transfor-
mations in Higher Dimensions
Masaaki Wada and Osamu Kobayashi

Structure of Monogenic Functions
Yakov Krasnov

On the Radial Part of the Cauchy-
Riemann Operator
Thomas Hempfling

Hypercomplex Derivability—The
Characterization of Monogenic
Functions in R^{n+1} by Their Derivative
Helmuth R. Malonek

Hypermonogenic Functions
*Sirkka-Liisa Eriksson-Bique and
Heinz Leutwiler*

Reproducing Kernels for Hyperbolic
Spaces
Paula Cerejeiras

Index

ORDER FORM

Important: Please Use Promotion #Y1092 when placing your order.
This offer is only valid for individuals and excludes retail and library customers.

Shipping & Handling: Within North America (US, Canada and Mexico): \$4.00 for the first copy and \$1.00 for each additional copy. Outside North America: \$10.00 for the first copy and \$5.00 for each additional copy.

Please send me at the special pre-publication set price:

**Clifford Algebras and their Applications in Mathematical Physics
Volumes 1 & 2, ISBN 0-8176-4182-3 and 0-8176-4183-1**

Qty: _____ @ set pre-pub price of \$75.00 _____

Sub Total: _____

Sales Tax: _____

NY, NJ, CA, VT, IL, PA, TX, MO, MA & VA.
Canadian Residents, please add 7% GST.

Shipping & Handling: _____
See explanation of shipping charges above.

Total: _____

Please mail, fax or e-mail your order before June 30, 2000 to:

Marketing, Birkhäuser Boston, 175 Fifth Avenue, New York, NY 10010
Tel: 212-460-1651, Fax: 212-460-5817, E-mail: marketing@birkhauser.com

Payment Method

Please send a proforma invoice
